GOVERNMENT SOLUTIONS EXPERTS

Kforce Government Solutions (KGS) is a government contracting solutions provider that has offered a comprehensive portfolio of solutions to a wide range of Federal and Defense agencies since 1970. Today we offer a full-spectrum of solutions in Finance and Accounting, Enterprise Technology Engineering and Operations, Healthcare Informatics, and Research and Development.

A Trusted Partner

Developing the most effective, reliable solution is the focus of every KGS engagement. We accomplish this by working in close partnership with our clients, clearly understanding their goals and completely addressing their mission objectives. Examples include:

DoD Defense Threat Reduction Agency

KGS developed the Program Budget Review Module for DTRA, assessed and mitigated compliance risk, implemented CFO Act requirements, and has supported DTRA in achieving five unqualified (clean) audit opinions for the agency - an achievement unmatched in the industry.

USAF – Integrated Network Operations & Security Center

KGS provides enterprise-level 24/7 network operations, security, administration and service desk support for INOSC East which supports 104 physical locations and approximately 250,000 users and 160,000 classified/unclassified systems. Additionally, KGS provides direct support to INOSC West for its enterprise infrastructure/boundary protection mission.

Defense Intelligence Agency

KGS developed the first ever agency-wide Information Technology Common Operational Picture (IT COP) data service that provides unprecedented near real-time visibility into IT operations. DIA IT leaders are using the IT COP to successfully consolidate their IT infrastructure, forecast the potential impact of IT changes, and effectively pinpoint where they should invest their limited IT resources to have the most positive impact.

The Data Confidence® Difference

Central to all KGS solution engagements is our focus on Data Confidence - the measurable certainty that critical data is immediately actionable. To do this, KGS takes a holistic view of solutions to find ways of harnessing available data and turning it into actionable information – then ensures it is always available, assured, and current – to enable faster, more reliable decision making.

END-TO-END INTEGRATED SOLUTIONS

A true solution-oriented partner to our clients, KGS is a premier provider of financial management and accounting, enterprise technology engineering and operations, healthcare informatics, enterprise data architecture, business process, and research and development solutions:
