## PROFESSIONAL AND TECHNICAL SOLUTIONS (PTS)

Government agencies face a mosaic of challenges – mission objectives, policies, regulations, resource availability, and constantly changing constituency requirements add to their complexity. The Kforce Government Solutions (KGS) Professional and Technical Solutions (PTS) team offers expert business and IT services that measurably improve organizational efficiency and effectiveness that leads directly to successful mission objective completion.

PTS brings proven approaches and an impressive record of success working in partnership with Federal agency clients to overcome IT, business process, data, and knowledge management challenges. Our team offers clients award-winning solutions that provide a roadmap to Data Confidence® - the measurable certainty that critical customer data is immediately actionable. To do this, KGS takes a holistic view of solutions to find ways of harnessing available data and turning it into actionable information – then ensures it is always available, assured, and current – to enable faster, more reliable decision making. PTS solutions provide:

- Comprehensive program management support focusing on scope, cost and time to provide improved approaches for our customers
- Data & IT governance and stewardship to provide the right data to the right people at the right time, ensuring it is always reliable, available and secure
- Lean Six Sigma approaches that support an organization's process improvement
- Quality assurance by developing metrics programs that measure organizational performance and enhance continuous improvement
- Management analysis and focused logistics planning support
- Information Security and Information Assurance to ensure data and systems remain protected

KGS creates and implements integrated and enduring solutions to resolve a client organization's most complex challenges. Combining domain expertise with KGS Data Confidence® practices enables our professionals to provide clients with customized solutions built upon proven methods.
